

Opioids' Burden on Hospital Care: A State-by-State Comparison

The nation's opioid epidemic resulted in a 64 percent rise in opioid-related hospital stays between 2005 and 2014. However, hospital rates varied widely by state in 2014, ranging from 404 opioid-related stays per 100,000 people in Maryland to 73 per 100,000 in Iowa. This map shows the states with the highest and lowest rates in 2014.

**Rates of Opioid-Related Hospital Stays:
How States Compared in 2014**

Highest Rates	Middle Rates	Lowest Rates
Connecticut	Arizona	Arkansas
District of Columbia	California	Georgia
Illinois	Colorado	Hawaii
Maine	Florida	Iowa
