## OVERVIEW

The Healthcare Cost and Utilization Project (HCUP) is a family of health care databases and related software tools and products developed through a Federal-State-Industry partnership and sponsored by the Agency for Healthcare Research and Quality (AHRQ). HCUP includes the largest collection of longitudinal hospital care data in the United States, with all-payer, encounter-level information beginning in 1988. These databases enable research on a broad range of health policy issues, including cost and quality of health services, medical practice patterns, access to health care programs, and outcomes of treatment at the national, state, and local market levels. The HCUP databases include the following:

- The Nationwide Inpatient Sample (NIS) – the largest all-payer inpatient care database in the United States, containing data on nearly eight million hospital stays per year from approximately 1,000 hospitals.
- The Kids' Inpatient Database (KID) – a nationwide sample of pediatric inpatient discharges.
- The State Inpatient Databases (SID) – inpatient discharges from a census of hospitals in participating states.
- The State Ambulatory Surgery Databases (SASD) – ambulatory surgery encounters from hospital-affiliated and sometimes freestanding ambulatory surgery sites from selected states.
- The State Emergency Department Databases (SEDD) – hospital-affiliated emergency department visits that do not result in hospitalizations, collected from participating states.

The objective of this report is to identify relevant sources of population data that can be used with the HCUP databases to calculate rates of hospital care events per population. This compilation includes data sources that provide nationwide population counts based on people, and not hospitals, physicians, or local resources. Not included are data sources collected by associations (e.g., the March of Dimes) or data collected for only one or a few states.

When possible, collections with a mixture of information (i.e., demographic, health status, resource information) or other helpful resources are also mentioned.

Table 1 lists the array of population data sources referenced in this report.

**Table 1. Population Denominator Data Consistent with Information in the HCUP Databases**

This table lists possible sources of population denominator data. Please consult the description of the data source for more details. A list of abbreviations appears at the conclusion of this table.

## **POPULATION DATA SOURCES**

The descriptions on the following pages provide details on the data sources listed in Table 1 in alphabetic order. For each data source, the following information is provided:

- Sponsor organization
- Data collection method
- Population targeted
- Types of information available
  - Demographic – age, gender, race/ethnicity, income level, payer type, etc.
  - Geographic aggregation – national, regional, state, county, and ZIP Code
  - Diseases and health statistics – health status, diabetes, asthma, tobacco use, etc.

- Update cycle for data
- Web references (when available) for the data, published statistics, and online query tools.

## **NATIONAL POPULATION ESTIMATES**

Appendix A provides commonly used estimates from the Bureau of the Census on the resident population for the U.S., for regions (Northeast, Midwest, South, and West), and for the States from 1990 to the most recent year for which data are available. In addition, estimates are provided by gender, five-year age groups, and race-ethnicity at the national level. These estimates are also available electronically on the HCUP User Support Web site under the Method Series (<http://www.hcup-us.ahrq.gov/reports/methods.jsp>).

<b>AARP State Profiles</b>
Sponsor: AARP
Data Collection Method: This is a secondary data source which is a compilation of data from Federal health agencies and private organizations
Population Targeted: Varies
Types of Available Information: Demographic Information: Age distribution, race/ethnic composition, and poverty  Geographic Entity: State  Diseases and Health: Infant mortality rate, low birth weight infants, deaths per 100,000 population for various diseases, utilization of health services, health insurance, managed care, health expenditures, health resources
Update Cycle: Annual, beginning in 1991
Data System Home Page: <a href="http://www.aarp.org/research/health/carefinancing/state_profiles_reforming_the_health_care_system_20.html">http://www.aarp.org/research/health/carefinancing/state_profiles_reforming_the_health_care_system_20.html</a>
Published Statistics: <a href="http://www.aarp.org/research/health/carefinancing/state_profiles_reforming_the_health_care_system_20.html#states">http://www.aarp.org/research/health/carefinancing/state_profiles_reforming_the_health_care_system_20.html#states</a>
Online Query System: None

<b>American Community Survey (ACS)</b>
Sponsor: United States Census Bureau
Data Collection Method: Survey forms mailed, computer assisted telephone interviewing, and computer assisted personal interviewing
Population Targeted: Resident population in the United States
Types of Available Information: Demographic Information: Age, gender, race/ethnicity, annual household income, marital status, education, etc.  Geographic Entity: National, state, county  Diseases and Health: None
Update Cycle: Annual, beginning in 1999
Data System Home Page: <a href="http://www.census.gov/acs/www/">http://www.census.gov/acs/www/</a>
Published Statistics: <a href="http://factfinder.census.gov/home/saff/main.html?_lang=en">http://factfinder.census.gov/home/saff/main.html?_lang=en</a>
Online Query System: American Fact Finder <a href="http://factfinder.census.gov/home/saff/main.html?_lang=en">http://factfinder.census.gov/home/saff/main.html?_lang=en</a>  DataFerrett: <a href="http://dataferrett.census.gov/index.html">http://dataferrett.census.gov/index.html</a>

<b>Area Resource File (ARF)</b>
<p>Sponsor:</p> <p>National Center for Health Workforce Analysis (NCHWA), Bureau of Health Professions (BHP) within the Health Resources and Services Administration (HRSA)</p>
<p>Data Collection Method:</p> <p>Data integrated from more than 50 primary data sources, including the National Center for Health Statistics (mortality and natality records), the American Hospital Association (facilities statistics), and the American Medical Association (physician specialty data)</p>
<p>Population Targeted:</p> <p>Total U.S. population</p>
<p>Types of Available Information:</p> <p>Demographic Information: Age, gender, race/ethnicity, employment and unemployment, housing statistics, distribution of families and individuals by income groups, and total, per capita, and median income</p> <p>Geographic Entity: County. This information can be easily aggregated into larger geographic units</p> <p>Diseases and Health: No specific disease information is available</p>
<p>Update Cycle:</p> <p>Annual, beginning in 1980</p>
<p>Data System Home Page:</p> <p><a href="http://www.arfsys.com/">http://www.arfsys.com/</a></p>
<p>Published Statistics:</p> <p>None</p>
<p>Online Query System:</p> <p>None</p>

<b>Behavioral Risk Factors Surveillance System (BRFSS)</b>
<p>Sponsor:</p> <p>Centers for Disease Control and Prevention (CDC), National Center for Chronic Disease Prevention and Health Promotion</p>
<p>Data Collection Method:</p> <p>Cross-sectional survey using computer-assisted telephone interviewing</p>
<p>Population Targeted:</p> <p>Civilian non-institutionalized population residing in the United States</p>
<p>Types of Available Information:</p> <p>Demographic Information: Age, gender, race/ethnicity, annual household income, marital status, education, etc.</p> <p>Geographic Entity: National, state</p> <p>Diseases and Health: Examples include: health status, immunization, diabetes, tobacco use, HIV/AIDS, arthritis, asthma, and cardiovascular disease</p>
<p>Update Cycle:</p> <p>Annual, beginning in 1984</p>
<p>Data System Home Page:</p> <p><a href="http://www.cdc.gov/brfss/index.htm">http://www.cdc.gov/brfss/index.htm</a></p>
<p>Published Statistics:</p> <p><a href="http://www.cdc.gov/brfss/pubs/index.htm">http://www.cdc.gov/brfss/pubs/index.htm</a></p>
<p>Online Query System:</p> <p>Prevalence Data <a href="http://apps.nccd.cdc.gov/brfss/index.asp">http://apps.nccd.cdc.gov/brfss/index.asp</a>  BRFSS Maps <a href="http://apps.nccd.cdc.gov/gisbrfss/default.aspx">http://apps.nccd.cdc.gov/gisbrfss/default.aspx</a>  Trends Data <a href="http://apps.nccd.cdc.gov/brfss/Trends/TrendData.asp">http://apps.nccd.cdc.gov/brfss/Trends/TrendData.asp</a></p> <p>SMART: Selected Metropolitan/Micropolitan Area Risk Trends  <a href="http://apps.nccd.cdc.gov/brfss-smart/index.asp">http://apps.nccd.cdc.gov/brfss-smart/index.asp</a></p> <p>DataFerrett: <a href="http://dataferrett.census.gov/index.html">http://dataferrett.census.gov/index.html</a></p>

<b>Bureau of Economic Analysis (BEA)</b>
Sponsor: The U.S. Department of Commerce
Data Collection Method: Integration of various economic measures from various sources, including the Census Bureau, the Department of Education, and the Bureau of Labor Statistics (BLS)
Population Targeted: Varies
Types of Available Information: Demographic Information: Personal income, wages, and salaries  Geographic Entity: National, state, county  Diseases and Health: None
Update Cycle: Quarterly
Data System Home Page: <a href="http://www.bea.gov/index.htm">http://www.bea.gov/index.htm</a>
Published Statistics: <a href="http://www.bea.gov/scb/index.htm">http://www.bea.gov/scb/index.htm</a>
Online Query System: None

<b>Bureau of Labor Statistics (BLS)</b>
Sponsor: The U.S. Department of Labor
Data Collection Method: Quarterly tax reports submitted to State Employment Security Agencies
Population Targeted: Employed population in the U.S.
Types of Available Information: Demographic Information: Wages and salaries  Geographic Entity: National, state, county  Diseases and Health: None
Update Cycle: Quarterly
Data System Home Page: <a href="http://www.bls.gov/cew/home.htm">http://www.bls.gov/cew/home.htm</a>
Published Statistics: <a href="http://www.bls.gov/data/home.htm#tools">http://www.bls.gov/data/home.htm#tools</a>
Online Query System: None

<b>Census</b>
Sponsor: United States Census Bureau
Data Collection Method: Mailed survey forms
Population Targeted: Resident population in the United States
Types of Available Information: Demographic Information: Age, gender, race/ethnicity, annual household income, marital status, education, etc.  Geographic Entity: National, state, county  Diseases and Health: None
Update Cycle: Decennial census with annual estimates. Decennial census long form will be replaced in 2010 census by the American Community Survey (ACS)
Data System Home Page: <a href="http://www.census.gov/">http://www.census.gov/</a>
Published Statistics: <a href="http://www.census.gov/prod/www/titles.html">http://www.census.gov/prod/www/titles.html</a>
Online Query System: American Fact Finder <a href="http://factfinder.census.gov/home/saff/main.html?_lang=en">http://factfinder.census.gov/home/saff/main.html?_lang=en</a>

<b>Centers for Medicare &amp; Medicaid Services (CMS)</b>
Sponsor: Department of Health & Human Services
Data Collection Method: Enrollment data and survey
Population Targeted: Medicare and Medicaid beneficiaries
Types of Available Information: Demographic Information: Age, gender, birth dates, race, residence (Medicare Utilization & Enrollment, Medicaid Utilization & Enrollment) Socioeconomic and demographic characteristics (Medicare Current Beneficiary Survey)  Geographic Entity: National, state  Diseases and Health: Health status and functioning, health care use and expenditures, health insurance coverage (Medicare Current Beneficiary Survey) Health spending by service type and state (National Health Expenditure Data)
Update Cycle: Fiscal year
Data System Home Page: CMS home page: <a href="http://www.cms.gov">www.cms.gov</a>  Research Data Assistance Center (ResDAC), CMS-sponsored Website for data files and documentation: <a href="http://www.resdac.umn.edu/Available_CMS_Data.asp">http://www.resdac.umn.edu/Available_CMS_Data.asp</a>
Published Statistics: CMS Research, Statistics, Data & Systems: <a href="http://www.cms.hhs.gov/home/rsds.asp">http://www.cms.hhs.gov/home/rsds.asp</a>  Available through ResDAC: <a href="http://www.resdac.umn.edu/Tools/tech_pubs.asp">http://www.resdac.umn.edu/Tools/tech_pubs.asp</a>
Online Query System: None

<b>Current Population Survey (CPS)</b>
<p>Sponsor:</p> <p>Bureau of Labor Statistics and Bureau of the Census</p>
<p>Data Collection Method:</p> <p>Phone survey, with periodic surveys conducted by an interviewer who visits the sample unit</p>
<p>Population Targeted:</p> <p>Civilian non-institutionalized population in the United States</p>
<p>Types of Available Information:</p> <p>Demographic Information: Age, gender, race/ethnicity, marital status, education, etc.</p> <p>Geographic Entity: National, state</p> <p>Diseases and Health: Annual Demographic Survey (the March CPS supplement) includes income and health insurance coverage. See Appendix B for a discussion on using payer population estimates from the CPS with HCUP data.</p>
<p>Update Cycle:</p> <p>Monthly</p>
<p>Data System Home Page:</p> <p><a href="http://www.bls.census.gov/cps/cpsmain.htm">http://www.bls.census.gov/cps/cpsmain.htm</a></p>
<p>Published Statistics:</p> <p><a href="http://www.bls.census.gov/cps/pubsmain.htm">http://www.bls.census.gov/cps/pubsmain.htm</a></p>
<p>Online Query System:</p> <p>DataFerrett: <a href="http://dataferrett.census.gov/index.html">http://dataferrett.census.gov/index.html</a></p>

<b>Economic Research Service (ERS)</b>
Sponsor: United States Department of Agriculture
Data Collection Method: Urban-rural classifications based on Census data
Population Targeted: Resident population in the United States
Types of Available Information: Urban-rural classification methods: <ul style="list-style-type: none"> <li>• Rural-Urban Continuum Codes (RUCC) – classifies U.S. counties by urbanization and nearness to a metropolitan area.</li> <li>• Urban Influence Codes (UIC) – classifies U.S. counties by size of the largest city and nearness to metropolitan and micropolitan areas.</li> <li>• Rural-Urban Commuting Area Codes (RUCA) – classifies U.S. census tracts using measures of urbanization, population density, and daily commuting.</li> </ul> Geographic Entity: National, state, county
Update Cycle: A 10-year cycle; updates appear a few years after each decennial census
Data System Home Page: ERS Home Page: <a href="http://www.ers.usda.gov">http://www.ers.usda.gov</a>  Urban-rural classifications are accessed through <a href="http://www.ers.usda.gov/briefing/Rurality/">http://www.ers.usda.gov/briefing/Rurality/</a>
Published Statistics: <a href="http://www.ers.usda.gov/Publications/">www.ers.usda.gov/Publications/</a>
Online Query System: Online system that allows looking up RUCC county classifications: <a href="http://www.ers.usda.gov/Data/RuralUrbanContinuumCodes/2003/">http://www.ers.usda.gov/Data/RuralUrbanContinuumCodes/2003/</a>

<b>Health, United States</b>
<p>Sponsor:</p> <p>National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC), and the Department of Health and Human Services</p>
<p>Data Collection Method:</p> <p>This is a secondary data source which is a compilation of data from Federal health agencies and private organizations</p>
<p>Population Targeted:</p> <p>Varies</p>
<p>Types of Available Information:</p> <p>Demographic Information: Age distribution, race/ethnic composition, and poverty</p> <p>Geographic Entity: National, state</p> <p>Diseases and Health: Health insurance, preventive care, risk factors, limitation of activity, and mortality</p>
<p>Update Cycle:</p> <p>Annual, beginning in 1975</p>

<b>Medical Expenditure Panel Survey (MEPS)</b>
Sponsor: Agency for Healthcare Research & Quality, U.S. Department of Health and Human Services
Data Collection Method: Survey with computer assisted personal interviewing
Population Targeted: U.S. civilian non-institutionalized population
Types of Available Information: Demographic Information: Age, race, sex, marital status, education, income, poverty status, employment status, etc.  Geographic Entity: National, census region, and Metropolitan Statistical Area (MSA)  Diseases and Health: Health status, mental health status, extensive information pertaining to health care utilization and expenditure. The Household Component provides data from individual households and their members. The Insurance Component is a separate survey of employers that provides data on employer-based health insurance.
Update Cycle: Annual
Data System Home Page: <a href="http://www.meps.ahrq.gov/">http://www.meps.ahrq.gov/</a>

<b>National Comorbidity Survey Replication (NCS-R)</b>
Sponsor: National Institute of Mental Health
Data Collection Method: Survey using face-to-face computer-assisted personal interviews (CAPI)
Population Targeted: Adult and youth population in the United States
Types of Available Information: Demographic Information: Race/ethnicity, marital status, education, income, etc.  Geographic Entity: National  Diseases and Health: Mental disorders
Update Cycle: The baseline NCS-1 was fielded in 1990-92. The NCS-1 respondents were reinterviewed in 2001-02 for the NCS-2. The NCS Replication Survey (NCS-R) was carried out in a new national sample of 10,000 respondents. A survey of 10,000 adolescents (NCS-A) was added.

## APPENDIX A. NATIONAL POPULATION DATA

Appendix A includes a collection of national population tables to facilitate the use of this type of information. The following population data from the U.S. Census Bureau is available for 1990 to 2007:

- Annual estimates of the resident population for the U.S., census regions, and states
  - Table A.1.1 Annual Estimates of the Population for the United States and States: July 1, 2006 to July 1, 2007
  - Table A.1.2 Annual Estimates of the Population for the United States and States: July 1, 1998 to July 1, 2005
  - Table A.1.3 Annual Estimates of the Population for the United States and States: July 1, 1990 to July 1, 1997
- Annual estimates of the resident U.S. population by gender and five-year age groups
  - Table A.2.1 Annual Estimates of the Population by Sex and Five-Year Age Groups for the United States: July 1, 2006 to July 1, 2007
  - Table A.2.2 Annual Estimates of the Population by Sex and Five-Year Age Groups for the United States: July 1, 2000 to July 1, 2005
  - Table A.2.3 Annual Estimates of the Population by Sex and Five-Year Age Groups for the United States: July 1, 1990 to July 1, 1999
- Annual estimates of the resident U.S. population by gender and race/ethnicity
  - Table A.3.1 Annual Estimates of the Population by Sex, Race, and Hispanic Origin for the United States: July 1, 2006 to July 1, 2007
  - Table A.3.2 Annual Estimates of the Population by Sex, Race, and Hispanic Origin for the United States: July 1, 2000 to July 1, 2005
  - Table A.3.3 Annual Estimates of the Population by Sex, Race, and Hispanic Origin for the United States: July 1, 1990 to July 1, 1999

HCUP sometimes uses Claritas population data, instead of Census, because the population information is available at the ZIP Code level and can be aggregated into national population counts that are consistent with the HCUP data elements. Population data tables from Claritas are available for 2000 to 2006:

- Table A.4.1 Annual Estimates of the U.S. Population by Median Household Income Quartile, 2000 to 2006
- Table A.4.2 Annual Estimates of the U.S. Population by Urban/Rural Location, 2000 to 2006

**Table A.1.1 Annual Estimates of the Resident Population for the United States and States: July 1, 2006 to July 1, 2007**

(1) 'In combination' means in combination with one or more other races. The sum of the five race groups adds to more than the total population because individuals may report more than one race.

Resident Population Estimates of the United States by Sex, Race, and Hispanic Origin: April 1, 1990 to July 1, 1999, with Short-Term Projection to November 1, 2000. Population Estimates Program, Population Division, U.S. Census Bureau, Washington, D.C. 20233, Internet Release Date: January 2, 2001. (<http://www.census.gov/popest/archives/1990s/#national>)

**Table A.4.1 Annual Estimates of the U.S. Population by Median Household Income Quartile, 2001 to 2006**

Median Household Income Quartile	Population Estimates					
	2001	2002	2003	2004	2005	2006
Quartile 1	70,808,587	74,924,336	69,664,519	76,323,231	72,184,620	74,069,384
Quartile 2	72,417,821	67,591,640	73,559,081	73,175,783	73,179,269	72,324,060
Quartile 3	70,933,564	74,520,370	76,465,150	68,746,327	75,674,376	75,968,161
Quartile 4	69,738,298	69,706,370	70,937,808	74,642,649	74,058,028	75,615,954
Total U.S.	283,898,269	286,742,716	290,626,558	292,887,990	295,096,293	297,977,559

Source: Claritas Population Estimates, 2001 to 2006

Because the cut-points for the median household income quartiles are updated annually, the value ranges for the quartiles vary by year. The dollar ranges represented by each category are:

Median Household Income Quartile	Quartile Ranges					
	2001	2002	2003	2004	2005	2006
Quartile 1	1- 33,999	1- 35,999	1- 35,999	1- 35,999	1- 36,999	1- 37,999
Quartile 2	34,000- 43,999	36,000- 45,999	36,000- 44,999	36,000- 44,999	37,000- 45,999	38,000- 46,999
Quartile 3	44,000- 58,999	46,000- 61,999	45,000- 59,999	45,000- 58,999	46,000- 60,999	47,000- 61,999
Quartile 4	59,000+	62,000+	60,000+	59,000+	61,000+	62,000+

In the HCUP databases, the data element ZIPINC\_QRTL contains the median household income quartile, values 1 to 4, for the ZIP Code of the patient's residence. The above population data table uses the same definitions of median household income.

**Table A.4.2 Annual Estimates of the U.S. Population by Urban/Rural Designation, 2000 to 2006**

Urban-Rural Designation	Population Estimates						
	2000	2001	2002	2003	2004	2005	2006
Large metropolitan areas with at least 1 million residents	148,719,266	150,561,933	152,424,045	154,950,524	156,588,524	157,808,829	159,355,694
Small metropolitan areas with less than 1 million residents	83,299,109	84,265,701	85,033,823	86,016,035	86,848,867	87,605,631	88,627,068
Micropolitan	28,841,168	29,095,533	29,288,910	29,542,228	29,502,573	29,686,671	29,900,208
Not metropolitan or micropolitan	19,832,671	19,975,102	19,995,938	20,117,771	19,948,026	19,995,162	20,094,589
Total U.S.	280,692,215	283,898,269	286,742,716	290,626,558	292,887,990	295,096,293	297,977,559

Source: Claritas Population Estimates, 2000 to 2006

In the HCUP databases, the data element PL\_URCAT4 contains the four category urban-rural designation for the patient's county of residence. The above population data table uses the same definitions of urban-rural designation.

## APPENDIX B. USING PAYER POPULATION ESTIMATES FROM THE CPS WITH HCUP DATA

Rosanna M. Coffey, Ph.D., Katharine Levit, and Marguerite Barrett

During the development of AHRQ Quality Indicator (QI) estimates from HCUP data for the first National Healthcare Quality Report (NHQR), the possibility of using the Current Population Survey (CPS) for population denominators related to QIs stratified by hospital bill payer was considered and abandoned. The difficulty was that the NHQR measures were categorized by the primary expected payer of the hospital bill (a mutually exclusive concept in HCUP), while the CPS captures the health insurance coverage of the population, where one respondent can have multiple types of coverage. Our assessment was that there was not a ready translation from CPS counts by health insurance coverage (including uninsured) to HCUP primary payer categories (including no payment, government subsidy programs, and liability insurance) and that a quick attempt at such a translation was not defensible. When we attempted to create mutually exclusive payer categories from CPS data, the payer categories underestimated some payer populations.

Below we raise some of the differences between HCUP and CPS that we are aware of. We present them here, in case HCUP data users are considering using the CPS as population denominators. Solutions to these issues would require an investment of resources and more exploration.

To understand the following discussion, it is important to be familiar with how HCUP retains information on the expected primary payer. The coding schemes utilized by state-specific data sources are retained as provided in the HCUP data element PAY1\_X. During the processing of the data into HCUP uniform files, the state-specific coding in PAY1\_X is mapped into a uniform coding scheme in the HCUP data element PAY1. For example, any state-specific values in PAY1\_X that refer to either fee-for-service and managed care Medicare patients are mapped to the value one (1) for PAY1. The uniform coding scheme of PAY1 simplifies the analysis of the expected primary payer across states, but often obscures the additional detail available in PAY1\_X.

### Payer vs. Insurance Conceptual Differences

**Problem:** Because the concepts of HCUP “payer” and CPS “insurance” are inherently different, there will never be an exact match between the two. CPS represents health insurance coverage (including multiple coverages) plus an estimate of the uninsured. HCUP retains the hospital primary bill payers (including a category for when there is no payment). The devil is in the details.

**Potential Solution:** To address the issue of conceptual differences in payers, one could impute ‘primary’ insurance coverage for individuals in CPS who have multiple coverages. This would be done by employing a set of rules as to which insurance takes precedence over other insurance coverages when it comes to paying bills. Such an order of precedence would most likely be Medicare, other government insurance (CHAMPVA, CHAMPUS), private insurance, and Medicaid. After each individual with multiple coverages in CPS is assigned a primary insurer, then the CPS data can be tabulated to create “primary payer” denominators for Medicare, CHAMPVA/CHAMPUS, private insurance, and Medicaid.

Tabulations could also be made of the uninsured, which for CPS would be any person not covered by one of these previously mentioned insurance programs. Similar counts of the uninsured in HCUP include “no charge,” “self-pay,” and government program payments sometimes identified in the state-specific payer field (PAY1\_X). In addition, CPS tabulations could be made of workers, which would be an appropriate denominator for analysis of certain states where the data element PAY1\_X indicates workers’ compensation as the primary payer. (Ninety-six percent of all workers are covered by workers’ compensation, so this is a reasonable denominator for this payer type.)

Note that CPS would not be useful in creating population denominators similar to state-specific payer categories (PAY1\_X) for programs that pay for services but are not insurance (e.g., maternal and child health programs, state-county run mental health and substance abuse programs, black lung program, corrections system, etc. ) or for homeowners or automobile liability insurance payments. CPS respondents who only have coverage through these programs would be considered uninsured.

### **Other Payer vs. Uninsured**

**Problem:** HCUP uniform coding of payer (PAY1) identifies the following government subsidy programs (other than Medicaid) in an “other” payer group: CHAMPUS, CHAMPVA, Indian Health Service, child health insurance programs, maternal and child health programs, state-county run mental health and substance abuse programs, black lung program, corrections system, and other general assistance state and county programs. Also included in the “other” payer group are non-government payers such as workers’ compensation<sup>1</sup>, accident insurance, etc. CPS, which aims to measure health insurance coverage of the population, counts people in government assistance programs (other than Medicaid) as part of the uninsured population if they have no other health insurance coverage. HCUP uniform coding (PAY1) includes a category for “self-pay” and “no charge” (uninsured from the hospital perspective).

**Potential Solution:** For analyses of specific states, it would be possible to regroup the state-specific payer categories (PAY1\_X) involving government subsidy programs (other than Medicare, Medicaid, and CHAMPUS/CHAMPVA) as uninsured for comparability with the CPS. This may or may not be helpful, depending on the purpose of the analysis.

### **Total vs. Non-Institutionalized Populations**

**Problem:** The CPS universe covers only the non-institutionalized population, whereas HCUP covers hospital stays for the entire population. The most obvious segment of the population missing from the CPS universe but included in HCUP is the aged population residing in nursing homes.

**Potential Solution:** This mismatch is difficult to solve because the data provided to HCUP does not contain accurate information on which admissions are from or to nursing homes. Because many patients from nursing homes are admitted to the hospital through the emergency department, identifying admissions from and discharges to nursing homes from the HCUP data elements for the patient admission route and discharge disposition underestimates the actual number.

---

<sup>1</sup> Workers’ Compensation is state mandated, but is fully funded by employers. It becomes the sole payer of services once liability is established.

## Time Dimension Differences

**Problem:** Another issue to consider is the time dimension of the two measures – a point in time for a HCUP discharge versus recall for a year in the CPS. Even if the two sources could be joined, the estimates will undoubtedly differ by a factor related to time dimension because some people change insurance categories during the year (e.g. uninsured to Medicaid).

**Potential Solution:** No immediate solution.

## Uniform Payer Tangent

**Problem:** A tangential issue that is worth considering is the inconsistency in the state-specific reporting of payer categories which limits the creation of truly consistent uniform HCUP categories for PAY1. For example, in scrolling through state-specific HCUP documentation for the uniformly coded expected payer PAY1, Hill-Burton charity care is often classified as “no-charge,” but sometimes included under “other payer” when the state-specific data source combines Hill-Burton and other government programs into one “other government” category. In addition, state-specific data sources sometimes do not distinguish other government programs from other non-government programs. This distinction would be beneficial for HCUP and its consistency with CPS.

**Solution:** No immediate solution.

## Other Considerations

There are two other considerations for better aligning HCUP to CPS and for using other, more definitive sources for some denominators:

**Using HCUP Secondary Payer.** There may be other ways to use HCUP payer data, depending on the purpose of the analysis. For example, analysts might use both the primary and secondary payer categories (available for some states) in HCUP to get a better idea of the number and types of discharges that are covered by various insurance payers and programs. All of the combinations of payers in the CPS could be compared with the relevant combinations in HCUP. This would allow for more careful construction of payer denominators for studies of specific populations. Rules (such as who is likely to pay the bill, as noted above) also could still be used to collapse to more manageable groups for analysis. Again the other payers would have to be grouped into no insurance, and people covered in the hospital by workers’ compensation would have to be paired with CPS “counts-of-workers” denominators or left out.

**More Definitive Sources.** Alternatively, beneficiary counts for major payers (Medicare, private insurance, Medicaid, no charge, and self-pay) should be able to be tied to population estimates nationally and at the state level from definitive programmatic and other survey sources. It may be best to use CMS Medicare and CMS or state Medicaid enrollment as the definitive source for those programs and to use CPS for private insurance and uninsured. For other payers, depending on the analytic need, it might be best to obtain counts (person-years) for many of these programs directly from the agencies involved. For example, the National Academy for Social Insurance develops counts of people covered by workers’ compensation in recent years ([http://www.nasi.org/publications2763/publications\\_show.htm?doc\\_id=385937](http://www.nasi.org/publications2763/publications_show.htm?doc_id=385937)), while the Indian Health Services counts people eligible for IHS services. Counts for other populations might be explored (e.g., the nursing home population).

Some of the issues presented above need to be assessed. The more important issues that would have a major impact on population estimates would need to be dealt with in some effective way for HCUP numbers to be related to population insurance estimates in some reasonable manner.
